

2nd annual

Digital Ship Scandinavia 2005

March 16-17, 2005, Telenor headquarters, Fornebu, Oslo

www.thedigitalship.com/scandinavia2.htm**Digital Ship**

Two day conference / exhibition about maritime information technology, including software for documentation management - developments in satellite communications - electronic purchasing - improving transparency

In association with **AMMITEC**, the Association of Maritime Managers of Information Technology and Communications
Conference producer -
Dr Panagiotis Nomikos,
president, Ammitec

A.M.M.I.T.E.C.

Sponsored by Broadband Maritime

Dinner sponsor and global sponsor of Inmarsat events 2005 - Inmarsat

CONFERENCE

- Should Fleet MPDS be always on? Improving ship and shore quality of reactivity - obstacles to greater utilisation of Fleet MPDS always on - avoiding large bills - what initiatives are the LESOs making to help shipping companies control their MPDS costs?
- Assessment of the VSAT options - how does a shipping company choose between the \$1,995 per month service from Broadband Maritime or the \$4,800 service from Telenor, both for global VSAT including equipment lease?
- How can shipping companies justify the costs of VSAT - or are they better off making better value from their Inmarsat services
- Connexion by Boeing - service overview
- Managing shipboard virus updates - how can it be performed effectively?
- Ship condition based monitoring and information technology - how much value can it add
- Ship routing tools - how much can they help reduce fuel costs, and why are they not used more widely? Is it because the charterer pays for the fuel and the shipowner implements the system? Or is it because they cannot practically lead to large reductions in fuel costs?
- Can software help reduce demurrage costs (delays at port) and how can this work
- How much navigation is possible today using official vector electronic charts - when can you throw away your paper

OUTLINE AGENDA

Day one

morning - satellite communications and broadband
afternoon - applications for satellite communications and software
5pm - AMMITEC Scandinavia branch meeting, open invitation to attend
6pm - cocktails for all attendees
evening - dinner sponsored by Inmarsat in central Oslo restaurant- admission for all attendees and speakers

Day two

morning - electronic charts
afternoon - electronic purchasing (including panel sessions for purchasing managers, ship suppliers and electronic service providers)

SPECIAL SESSION - ELECTRONIC CHARTS

Navigating legally with official electronic charts - what is possible? How easy are the systems to use? When can shipping companies throw away their paper charts? What are the benefits of official charts over non official charts, and why should shipping companies use them

SHIPPING COMPANY SPEAKERS AND PANEL PARTICIPANTS
