

Entrance is free for all shipping companies and only \$695 for all others

# 3rd Annual Digital Ship USA 2010

## 22 & 23 September 2010

### The Italian Center, Stamford, Connecticut

# Digital Ship

## Maritime Information Technology Conference and Exhibition

**Introducing the first focus session on improving communications between charterers and shipping companies**

Digital Ship is the world's leading magazine and events company for information technology in the deep sea commercial maritime industry. Digital Ship conferences take place in leading global maritime hubs such as Hamburg, Cyprus, Athens, Dubai, Singapore, and Oslo, and we are pleased to announce the 3rd annual Digital Ship USA conference and exhibition. Once again, this market leading conference will look at all the major issues impacting and concerning this industry – including satellite communications, software and technology development, electronic charts and navigation, piracy, manning and training, using IT to reduce costs, and of course many other topics – including a special session on the role of communications in the relationship between shipping company and charterer. The exhibition will present an opportunity to review the latest products and services available and to learn about new technologies and best practices. There will also be plenty of networking sessions and an exclusive Gala Dinner kindly hosted by Inmarsat. For more information please go to [www.thedigitalship.com](http://www.thedigitalship.com)
