Be mobile everywhere

- **On Waves teams with distribution channels and through them, installs its GSM system on any ship.**
- **On Waves service needs no dedicated bandwidth from the VSAT service. When a call is in progress the On Waves system is using 4kbps of bandwidth.**
- **On Waves owns, operates and installs the system for free. There are no monthly fees or any costs to the ship owner.**
- **On Waves service, except through Roaming, can be used via dedicated pre-paid, rechargeable cards and GSM phones.**
- **One minute of call, to any destination, from any place on earth has a cost of \$0,89 and an SMS has a cost of \$0,22.**
